

XMLRPC\_getParams

```
graph LR; A[XMLRPC_getParams] --> B[XMLRPC_adjustValue]
```

A diagram showing a call from XMLRPC\_getParams to XMLRPC\_adjustValue. The first box, XMLRPC\_getParams, is shaded gray and has a thick black border. A blue arrow points from its right side to the second box, XMLRPC\_adjustValue, which is white with a thick black border.

XMLRPC\_adjustValue
